PROJECTS

Project Name : Online Product Store

Technologies : Servlet,JSP,JDBC,HTML,CSS,JS

Description :

- This project allowed users to seamlessly browse, purchase, and add products to their carts, enhancing their shopping experience.
- Furthermore, I incorporated admin features for inventory management, user management, and order processing, enabling efficient interaction between users and administrators.
- This project not only showcased my proficiency in e-commerce development but also demonstrated my ability to create dynamic and secure web applications for diverse user interactions.

GitHub : <https://github.com/SyedFaizan7058/Online-Product-Store.git>

Project Name : Portfolio

Technologies : HTML,CSS & JS

Description :

- As a Software Developer, I take pride in showcasing the portfolio that reflects my Education, skill set hobbies and contact details.

GitHub : <https://github.com/SyedFaizan7058/Portfolio.git>

Project Name : Room Booking System

Technologies : Core Java

Description :

- I independently developed a room booking system using core Java, showcasing my proficiency in object-oriented programming.
